<b>Issues:</b>	<b>Backlog:</b>	<b>Ready:</b>	<b>In-progress:</b>	<b>Done:</b>
Understanding the project flow		Feb 13 3:21 pm	Feb 13 3:22 pm	Feb 13 8:15 pm
Running a program from command line		Feb 13 8:16 pm	Feb 13 8:17 pm	Feb 13 9:10 pm
Taking file name from command line		Feb 13 9:16 pm	Feb 13 9:16 pm	Feb 13 11:20 pm
understanding of antlr	Feb 14 11:30 pm			
understanding of javaparser		Feb 15 3:31 pm	Feb 15 3:31 pm	
understanding of plantuml		Feb 15 6:30 pm	Feb 15 6:30 pm	
Understanding how to get name of methods if a class name is given Javaparser		Feb 15 4:30 pm	Feb 15 4:30 pm	Feb 18 4:30 pm
Implementing how to get name of methods if a class name is given using javaparser		Feb 18 4:30 pm	Feb 18 4:30 pm	
Understanding how to get name of attributes if a class name is given Javaparser		Feb 18 4:30 pm	Feb 18 4:30 pm	
Getting names of all the classes from directory		Feb 18 4:30 pm		

<b>Issues:</b>	<b>Status:</b>	<b>Total Cycle Time:</b>	<b>In- progress Time</b>
Understanding the project flow	Done	5 hours	
Running a program from command line	Done	1 hour	
Taking file name from command line	Done	2 hours	
understanding of antlr	Backlog		
understanding of javaparser	In Progress		5 Days
understanding of plantuml	In Progress		5 Days
Understanding how to get name of methods if a class name is given Javaparser	Done	3 Days	
Implementing how to get name of methods if a class name is given using javaparser	In Progress		3 hours
Understanding how to get name of attributes if a class name is given Javaparser	In Progress		3 hours
Getting names of all the classes from directory	Ready
